International Workshop on Cryptography, Robustness, and Provably Secure Schemes for Female Young Researchers (CrossFyre)

October 6-7, 2022 - Passau, Germany (Hybrid)

CONCEPT

The CrossFyre Workshop brings together young researchers in the field of Cryptography and Information Security to help them to promote their research. An additional aim is to raise awareness among participants on gender-equality, to present the outcome of relevant social studies on the topic, and to discuss possible measures for improving the current situation. We encourage everyone to join the event regardless of their gender. We also welcome undergraduate students to this workshop, and strongly encourage supervisors to support their students' active or passive participation.

ORGANIZATION

The workshop is organized by the University of Passau and the University of Regensburg (Germany).

The event has been organized annually since 2011, more information online (last year's webpage):

<http://crossfyre20.cs.ru.nl/>

WORKSHOP FORMAT

- Keynote talks
- Fellow researchers introducing themselves, their contributions to the field as well as their ongoing research. Selected fields: cryptography, security, robustness, provable security, etc., are briefly outlined.
- A plenary panel discussion on positions and perspectives of women in research and on gender-equality (example topic: "Being A Female Scientist")
- Coffee breaks for networking opportunity (sponsors can give out advertisement material such as flyers during the breaks)
- Social event and banquet
